

# VOLUMETRIC MIXERS

# VS

# BARROW MIXERS

The ingredients are stored in separate compartments on the truck

... so only what's needed is mixed on-site ensuing **no waste**

Can store approx **7.5m<sup>3</sup>**

## Cheaper

Less waste means the customer only pays for what they use

## More Efficient & Flexible

Amount mixed can be altered & tailored to what's required on-site

The ingredients are added and mixed at the plant

... which means that anything not use on-site is **wasted**

... almost double that of traditional barrow mixers
